This transfer guide is designed as an advising tool to facilitate a smooth transition between institutions by identifying relevant course work recommended to be completed prior to transfer.

Community college students are encouraged to:

- Complete an A.A. or A.S. degree prior to transfer
- Utilize the NIU Articulation Handbook for information regarding the transferability of courses: [http://www.niu.edu/admissions/transfer/plan/credits/index.shtml](http://www.niu.edu/admissions/transfer/plan/credits/index.shtml)
- Consult with the College of Health and Human Sciences and/or review the websites for their intended majors for detailed information about special requirements, program admission requirements, and course requirements: [www.chhs.niu.edu](http://www.chhs.niu.edu)

**Public Health (B.S)** The public health program prepares students for professional positions in general public health, health administration, environment and health, and health promotion. Depending on their particular interests, graduates will be involved in developing and communicating health information to the public, planning and managing health service programs and facilities, and investigating and evaluating specific environmental and community health problems. As professionals, public health alumni work in a variety of capacities to:

- Improve access to health care
- Clean up environmentally contaminated sites
- Make our streets and homes safe from violence
- Advocate health programs for communities, including oral and respiratory health
- Prevent and treat substance abuse
- Assure the safety of our food supply
- Plan quality health care for our elders
- Manage the delivery of health services
- Contain the spread of infectious diseases
- Deliver smoking cessation programs

Among the many position titles for public health professionals are: epidemiologist, health administrator, health educator, health inspector, and geriatric care manager. Working behind the scenes everywhere in health care, public health professionals make the lives of countless individuals healthier and safer.

In **Public Health**, the program offers four different emphases: general public health, health administration, environment and health, and health promotion. There is also a degree completion
option* for applied health professionals. Among the hundreds of different position titles for public health professionals are epidemiologist, sanitarian, health educator, and geriatric care manager. Because of the complexity of the problems public health professionals work to solve, students considering a career in public health need to have a background in the biological, mathematical and social sciences.

*The degree completion option for applied health professionals is in the general public health and health administration emphases. Allied health professionals must hold an AAs degree in one of the following fields: dental hygiene, respiratory care, radiologic technology, long-term care administration, health information technology, nursing, occupational therapy assistant, physical therapy assistant, speech-language pathology assistant, and surgical technology, or other appropriate health care area.

Special Note: Students who enter the public health program with the courses listed here and who have completed an A.A. or A.S. degree can usually expect to complete the NIU program in two years (including summer school).

**Major in Public Health – Emphasis 2: Health Administration**
